Common mistakes in Connect 4 HW

- Very few people did name validation
  (no empty string, no special characters, etc)

- Very few people commented the code nicely

- Several people had paths to assets wrong

- Unnecessary loops and nested ifs which you can just && together

- Almost everyone had all JS code in 1 file

- For several people, birthdays such as 13/13/23413234324 passes validation

- For many people, Birthdays such as 12/12/2019 passes validation

- Most people did not have 'unique' localStorage key
